IIE Transactions (2002) **34**, 1115–1127

DESIGN AND MANUFACTURING

AUTHOR INDEX FOR 2002

Ben-Gal, I. and J. Bukchin; *The ergonomic design of workstations using virtual manufacturing and response surface methodology*; April; 375
Bukchin, J. and I. Ben-Gal; *The ergonomic design of workstations using virtual manufacturing and response surface methodology*; April; 375

Callewier, D., L. De Boeck and N. Vandaele; *An open queueing system network for lead time analysis*; January; 1
Chiu, L.C., P.K. Wah, K.G. Murty and A. Joneja; *Tool path optimization in layered manufacturing*; April; 335
Cho, H., K. Song, P.Y. Jang and C-H. Jun; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881

Dallery, Y. and G. Liberopoulos; *Base stock versus WIP cap in single-stage make-to-stock production–inventory system*; July; 627
De Boeck, L., N. Vandaele and D. Callewier; *An open queueing system network for lead time analysis*; January; 1
Donohue, K.L., W.J. Hopp and M.L. Spearman; *Optimal design of stochastic production lines: a dynamic programming approach*; October; 891

Elitzur, R., K. Kogan and T. Raz; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63
Erel, E., I. Sabuncuoglu and A. Gurhan Kok; *Analysis of assembly systems for interdeparture time variability and throughput*; January; 23

Foley, R.D., E.H. Frazelle and B.C. Park; *Throughput bounds for miniload automated storage/retrieval systems*; October; 915
Frazelle, E.H., R.D. Foley and B.C. Park; *Throughput bounds for miniload automated storage/retrieval systems*; October; 915
Fuh, J.Y.H., S.H. Wu and A.Y.C. Nee; *Concurrent process planning and scheduling in distributed virtual manufacturing*; January; 77

Gadh, R. and H. Srinivasan; *A non-interfering selective disassembly sequence for components with geometric constraints*; April; 349
Gel, E.S., W.J. Hopp and M.P. Van Oyen; *Factors affecting opportunity of worksharing as a dynamic line balancing mechanism*; October; 847
Gershwin, S.B., T. Tolio and A. Matta; *Analysis of two-machine lines with multiple failure modes*; January; 51
Graves, R.J., B-I. Kim, S.S. Heragu and A. St. Onge; *Intelligent agent modelling of an industrial warehousing problem*; July; 601
Gurhan Kok, A., I. Sabuncuoglu and E. Erel; *Analysis of assembly systems for interdeparture time variability and throughput*; January; 23
Gurumoorthy, B. and H.S. Nagaraj; *Machinable volume extraction for automatic process planning*; April; 393

Han, M-S. and D-J. Park; *Performance analysis and optimization of cyclic production lines*; April; 411
Heragu, S.S., B-I. Kim, R.J. Graves and A. St. Onge; *Intelligent agent modelling of an industrial warehousing problem*; July; 601
Hopp, W.J., E.S. Gel and M.P. Van Oyen; *Factors affecting opportunity of worksharing as a dynamic line balancing mechanism*; October; 847
Hopp, W.J., K.L. Donohue and M.L. Spearman; *Optimal design of stochastic production lines: a dynamic programming approach*; October; 891

Jang, P.Y., K. Song, H. Cho and C-H. Jun; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881
Jiang, Y., J. Liu and Z. Zhou; *Cyclic scheduling of a single hoist in extended electroplating lines: a comprehensive integer programming solution*; October; 905
Joneja, A., P.K. Wah, K.G. Murty and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335
Jun, C-H., K. Song, P.Y. Jang and H. Cho; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881

Kim, B-I., R.J. Graves, S.S. Heragu and A. St. Onge; *Intelligent agent modelling of an industrial warehousing problem*; July; 601
Kim, D-W., K-Y. Kim and B.O. Nnaji; *Robot arc welding task sequencing using genetic algorithms*; October; 865
Kim, K-Y., D-W. Kim and B.O. Nnaji; *Robot arc welding task sequencing using genetic algorithms*; October; 865
Kogan, K. and S.X.C. Lou; *Optimal production control: analytical solution for the limit cycles*; April; 363
Kogan, K., T. Raz and R. Elitzur; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63
Kogan, K., Y-Y. Leu and J.R. Perkins; *Parallel-machine, multiple-product-type, continuous-time scheduling: decomposable cases*; January; 11
Kouikoglou, V.S. and Y.A. Phillis; *Design of product specifications and control policies in a single-stage production system*; July; 591
Krieg, G.N. and H. Kuhn; *A decomposition method for multi-product kanban systems with setup times and lost sales*; July; 613
Kuhn, H. and G.N. Krieg; *A decomposition method for multi-product kanban systems with setup times and lost sales*; July; 613

Leu, Y-Y., K. Kogan and J.R. Perkins; *Parallel-machine, multiple-product-type, continuous-time scheduling: decomposable cases*; January; 11
Liberopoulos, G. and Y. Dallery; *Base stock versus WIP cap in single-stage make-to-stock production–inventory system*; July; 627
Liu, J., Y. Jiang and Z. Zhou; *Cyclic scheduling of a single hoist in extended electroplating lines: a comprehensive integer programming solution*; October; 905
Lou, S.X.C. and K. Kogan; *Optimal production control: analytical solution for the limit cycles*; April; 363

Matta, A., T. Tolio and S.B. Gershwin; *Analysis of two-machine lines with multiple failure modes*; January; 51
Murty, K.G., P.K. Wah, A. Joneja and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335

Nagaraj, H.S. and B. Gurumoorthy; *Machinable volume extraction for automatic process planning*; April; 393
Nakade, K., Z. Xiaobo and K. Ohno; *An optimal cart moving policy for a flexible manufacturing system*; January; 41
Nee, A.Y.C., S.H. Wu and J.Y.H. Fuh; *Concurrent process planning and scheduling in distributed virtual manufacturing*; January; 77
Nnaji, B.O., K-Y. Kim and D-W. Kim; *Robot arc welding task sequencing using genetic algorithms*; October; 865

Ohno, K., Z. Xiaobo and K. Nakade; *An optimal cart moving policy for a flexible manufacturing system*; January; 41

Park, B.C., R.D. Foley and E.H. Frazelle; *Throughput bounds for miniload automated storage/retrieval systems*; October; 915
Park, D-J. and M-S. Han; *Performance analysis and optimization of cyclic production lines*; April; 411

0740-817X © 2002 "IIE"

Perkins, J.R., K. Kogan and Y-Y. Leu; *Parallel-machine, multiple-product-type, continuous-time scheduling: decomposable cases*; January; 11
Phillis, Y.A. and V.S. Kouikoglou; *Design of product specifications and control policies in a single-stage production system*; July; 591

Raz, T., K. Kogan and R. Elitzur; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63

Sabuncuoglu, I., E. Erel and A. Gurhan Kok; *Analysis of assembly systems for interdeparture time variability and throughput*; January; 23
Song, K., P.Y. Jang, H. Cho and C-H. Jun; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881
Spearman, M.L., K.L. Donohue and W.J. Hopp; *Optimal design of stochastic production lines: a dynamic programming approach*; October; 891
Srinivasan, H. and R. Gadh; *A non-interfering selective disassembly sequence for components with geometric constraints*; April; 349
St. Onge, A., B-I. Kim, R.J. Graves and S.S. Heragu; *Intelligent agent modelling of an industrial warehousing problem*; July; 601

Tolio, T., A. Matta and S.B. Gershwin; *Analysis of two-machine lines with multiple failure modes*; January; 51
Tsai, T-N. and T. Yang; *Modeling and implementation of a neurofuzzy system for surface mount assembly defect prediction and control*; July; 637

Van Oyen, M.P., E.S. Gel and W.J. Hopp; *Factors affecting opportunity of worksharing as a dynamic line balancing mechanism*; October; 847
Vandaele, N., L. De Boeck and D. Callewier; *An open queueing system network for lead time analysis*; January; 1

Wah, P.K., K.G. Murty, A. Joneja and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335
Wu, S.H., J.Y.H. Fuh and A.Y.C. Nee; *Concurrent process planning and scheduling in distributed virtual manufacturing*; January; 77

Xiaobo, Z., K. Ohno and K. Nakade; *An optimal cart moving policy for a flexible manufacturing system*; January; 41

Yang, T. and T-N. Tsai; *Modeling and implementation of a neurofuzzy system for surface mount assembly defect prediction and control*; July; 637

Zhou, Z., J. Liu and Y. Jiang; *Cyclic scheduling of a single hoist in extended electroplating lines: a comprehensive integer programming solution*; October; 905

SUBJECT INDEX FOR 2002

1000 – Engineering design

Ben-Gal, I. and J. Bukchin; *The ergonomic design of workstations using virtual manufacturing and response surface methodology*; April; 375
Donohue, K.L., W.J. Hopp and M.L. Spearman; *Optimal design of stochastic production lines: a dynamic programming approach*; October; 891
Nagaraj, H.S. and B. Gurumoorthy; *Machinable volume extraction for automatic process planning*; April; 393

1100 – Manufacturing machines

Kim, K-Y., D-W. Kim and B.O. Nnaji; *Robot arc welding task sequencing using genetic algorithms*; October; 865
Wah, P.K., K.G. Murty, A. Joneja and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335

1200 – Manufacturing processes

Han, M-S. and D-J. Park; *Performance analysis and optimization of cyclic production lines*; April; 411
Srinivasan, H. and R. Gadh; *A non-interfering selective disassembly sequence for components with geometric constraints*; April; 349
Wah, P.K., K.G. Murty, A. Joneja and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335

1300 – Manufacturing systems

Han, M-S. and D-J. Park; *Performance analysis and optimization of cyclic production lines*; April; 411
Kogan, K., Y-Y. Leu and J.R. Perkins; *Parallel-machine, multiple-product-type, continuous-time scheduling: decomposable cases*; January; 11
Kouikoglou, V.S. and Y.A. Phillis; *Design of product specifications and control policies in a single-stage production system*; July; 591
Krieg, G.N. and H. Kuhn; *A decomposition method for multi-product kanban systems with setup times and lost sales*; July; 613
Liberopoulos, G. and Y. Dallery; *Base stock versus WIP cap in single-stage make-to-stock production–inventory system*; July; 627
Sabuncuoglu, I., E. Erel and A. Gurhan Kok; *Analysis of assembly systems for interdeparture time variability and throughput*; January; 23
Song, K., P.Y. Jang, H. Cho and C-H. Jun; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881
Tolio, T., A. Matta and S.B. Gershwin; *Analysis of two-machine lines with multiple failure modes*; January; 51
Vandaele, N., L. De Boeck and D. Callewier; *An open queueing system network for lead time analysis*; January; 1
Xiaobo, Z., K. Ohno and K. Nakade; *An optimal cart moving policy for a flexible manufacturing system*; January; 41
Yang, T. and T-N. Tsai; *Modeling and implementation of a neurofuzzy system for surface mount assembly defect prediction and control*; July; 637

1400 – Material handling

Foley, R.D., E.H. Frazelle and B.C. Park; *Throughput bounds for miniload automated storage/retrieval systems*; October; 915
Kim, B-I., R.J. Graves, S.S. Heragu and A. St. Onge; *Intelligent agent modelling of an industrial warehousing problem*; July; 601
Liu, J., Y. Jiang and Z. Zhou; *Cyclic scheduling of a single hoist in extended electroplating lines: a comprehensive integer programming solution*; October; 905

1500 – Process planning

Kim, K-Y., D-W. Kim and B.O. Nnaji; *Robot arc welding task sequencing using genetic algorithms*; October; 865
Nagaraj, H.S. and B. Gurumoorthy; *Machinable volume extraction for automatic process planning*; April; 393
Srinivasan, H. and R. Gadh; *A non-interfering selective disassembly sequence for components with geometric constraints*; April; 349
Wah, P.K., K.G. Murty, A. Joneja and L.C. Chiu; *Tool path optimization in layered manufacturing*; April; 335
Wu, S.H., J.Y.H. Fuh and A.Y.C. Nee; *Concurrent process planning and scheduling in distributed virtual manufacturing*; January; 77

2000 – Applied optimization

Donohue, K.L., W.J. Hopp and M.L. Spearman; *Optimal design of stochastic production lines: a dynamic programming approach*; October; 891

Kogan, K., T. Raz and R. Elitzur; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63

2100 – Applied probability

Sabuncuoglu, I., E. Erel and A. Gurhan Kok; *Analysis of assembly systems for interdeparture time variability and throughput*; January; 23
Song, K., P.Y. Jang, H. Cho and C-H. Jun; *Partial least square-based model predictive control for large-scale manufacturing processes*; October; 881
Vandaele, N., L. De Boeck and D. Callewier; *An open queueing system network for lead time analysis*; January; 1

2200 – Computer and emerging methodologies

Kim, B-I., R.J. Graves, S.S. Heragu and A. St. Onge; *Intelligent agent modelling of an industrial warehousing problem*; July; 601
Kim, K-Y., D-W. Kim and B.O. Nnaji; *Robot arc welding task sequencing using genetic algorithms*; October; 865

2300 – Quality and reliability engineering

Ben-Gal, I. and J. Bukchin; *The ergonomic design of workstations using virtual manufacturing and response surface methodology*; April; 375
Tolio, T., A. Matta and S.B. Gershwin; *Analysis of two-machine lines with multiple failure modes*; January; 51
Yang, T. and T-N. Tsai; *Modeling and implementation of a neurofuzzy system for surface mount assembly defect prediction and control*; July; 637

2500 – Engineering and technology management

Gel, E.S., W.J. Hopp and M.P. Van Oyen; *Factors affecting opportunity of worksharing as a dynamic line balancing mechanism*; October; 847
Kogan, K., T. Raz and R. Elitzur; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63

2600 – Ergonomics and human factors

Ben-Gal, I. and J. Bukchin; *The ergonomic design of workstations using virtual manufacturing and response surface methodology*; April; 375

3000 – Inventory

Kogan, K., T. Raz and R. Elitzur; *Optimal control in homogeneous projects: analytically solvable deterministic cases*; January; 63
Liberopoulos, G. and Y. Dallery; *Base stock versus WIP cap in single-stage make-to-stock production–inventory system*; July; 627

3200 – Location, transportation and distribution

Xiaobo, Z., K. Ohno and K. Nakade; *An optimal cart moving policy for a flexible manufacturing system*; January; 41

3300 – Production control

Kouikoglou, V.S. and Y.A. Phillis; *Design of product specifications and control policies in a single-stage production system*; July; 591
Krieg, G.N. and H. Kuhn; *A decomposition method for multi-product kanban systems with setup times and lost sales*; July; 613

3400 – Production planning

Gel, E.S., W.J. Hopp and M.P. Van Oyen; *Factors affecting opportunity of worksharing as a dynamic line balancing mechanism*; October; 847

3500 – Scheduling

Kogan, K., Y-Y. Leu and J.R. Perkins; *Parallel-machine, multiple-product-type, continuous-time scheduling: decomposable cases*; January; 11
Kogan, K. and S.X.C. Lou; *Optimal production control: analytical solution for the limit cycles*; April; 363
Liu, J., Y. Jiang and Z. Zhou; *Cyclic scheduling of a single hoist in extended electroplating lines: a comprehensive integer programming solution*; October; 905
Wu, S.H., J.Y.H. Fuh and A.Y.C. Nee; *Concurrent process planning and scheduling in distributed virtual manufacturing*; January; 77

GUEST REVIEWERS FOR 2002

Ron Askin, University of Arizona
Mohammed Ayoub, Texas Tech University
John Buzacott, York University, Toronto, Ontario
Michael C. Caramanis, Boston University
Don B. Chaffin, University of Michigan
T.C. Edwin Cheng, The Hong Kong Polytechnic University
Yves Dallery, Ecole Centrale Paris, France
Neil Duffie, University of Wisconsin
Andris Freivalds, Pennsylvania State University
Datta Goldbole, Honeywell Technology Center
Robert Huang, Honeywell
Jan Jelinek, Honewell Technology Center
Albert T. Jones, National Institute of Standards and Technology (NIST)
Russell King, North Carolina State University
Mark A. Lawley, Purdue University
Jingshan Li, GM Research and Development Center
John McClain, Cornell University
Henry McCoy, All Points Logistics
Douglas Montgomery, Arizona State University
Spyros Reveliotis, Georgia Institute of Technology
Sanjay Sarma, Massachusetts Institute of Technology
Rodrigo Marin Schlumberger, Reservoir Completions Center, Rosharon, TX
James Stori, University of Illinois at Urbana-Champaign
Kent Williams, University of Central Florida
S. David Wu, Lehigh University
Jeffrey C. Woldstad, Oregon State University
Joyce Yen, University of Washington
Zelda Zabinsky, University of Washington
W.H.M. Zijm, University of Twente, The Netherlands

SCHEDULING & LOGISTICS

AUTHOR INDEX FOR 2002

Bassok, Y., W. Hopp and M. Rohatgi; *A simple linear heuristic for the service constrained random yield problem*; May; 479

Beltrán, J.L. and D. Krass; *Dynamic lot sizing with returning items and disposals*; May; 437

Berman, O., Z. Drezner and G.O. Wesolowsky; *Satisfying partial demand in facilities location*; November; 971

Bukchin, J., M. Tzur and M. Jaffe; *Lot splitting to minimize average flow-time in a two-machine flow-shop*; November; 953

Buzacott, J., Q-M. He and E.M. Jewkes; *The value of information used in inventory control of a make-to-order inventory-production system*; November; 999

Buzacott, J.A., F. Karaesmen and Y. Dallery; *Integrating advance order information in make-to-stock production systems*; August; 649

Cakanyildirim, M. and R.O. Roundy; *SeDFAM: semiconductor demand forecast accuracy model*; May; 449

Carlyle, W.M., L. Yu, H.M. Shih, M. Pfund and J.W. Fowler; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921

Chayet, S., W.J. Hopp, M.L. Spearman, K.L. Donohue and E.S. Gel; *Using an optimized queueing network model to support wafer fab design*; February; 119

Chen, B., R. Hassin and M. Tzur; *Allocation of bandwidth and storage*; May; 501

Cheng, G-J. and Y-F. Hung; *Hybrid capacity modeling for alternative machine types in linear programming production planning*; February; 157

Cheng, T.C.E. and B.M.T. Lin; *Fabrication and assembly scheduling in a two-machine flowshop*; November; 1015

Cho, S. and V. Prabhu; *A vector space model for variance reduction in simple machine scheduling*; November; 933

Christie, R.M.E. and S.D. Wu; *Semiconductor capacity planning: stochastic modeling and computational studies*; February; 131

Chung, S.H., W.L. Pearn and M.H. Yang; *Minimizing the total machine workload for the wafer probing scheduling problem*; February; 211

Chung, S-H. and H-W. Huang; *Cycle time estimation for wafer fab with engineering lots*; February; 105

Cohen, M.A., Y. Wang and Y-S. Zheng; *Differentiating customer service on the basis of delivery lead-times*; November; 979

Curry, G.L. and B.L. Deuermeyer; *Renewal approximations for the departure processes of batch systems*; February; 95

Dallery, Y., F. Karaesmen and J.A. Buzacott; *Integrating advance order information in make-to-stock production systems*; August; 649

Deuermeyer, B.L. and G.L. Curry; *Renewal approximations for the departure processes of batch systems*; February; 95

Donohue, K.L., W.J. Hopp, M.L. Spearman, S. Chayet and E.S. Gel; *Using an optimized queueing network model to support wafer fab design*; February; 119

Drezner, Z., O. Berman and G.O. Wesolowsky; *Satisfying partial demand in facilities location*; November; 971

Duenyas, I. and S.M.R. Iravani; *Integrated maintenance and production control of a deteriorating production system*; May; 423

Ertek, G. and P.M. Griffin; *Supplier- and buyer-driven channels in a two-stage supply chain*; August; 691

Fowler, J.W., L. Yu, H.M. Shih, M. Pfund and W.M. Carlyle; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921

Gel, E.S., W.J. Hopp, M.L. Spearman, S. Chayet and K.L. Donohue; *Using an optimized queueing network model to support wafer fab design*; February; 119

Griffin, P.M. and G. Ertek; *Supplier- and buyer-driven channels in a two-stage supply chain*; August; 691

Hassin, R., B. Chen and M. Tzur; *Allocation of bandwidth and storage*; May; 501

He, Q-M., E.M. Jewkes and J. Buzacott; *The value of information used in inventory control of a make-to-order inventory-production system*; November; 999

Hopp, W., Y. Bassok and M. Rohatgi; *A simple linear heuristic for the service constrained random yield problem*; May; 479

Hopp, W.J., M.L. Spearman, S. Chayet, K.L. Donohue and E.S. Gel; *Using an optimized queueing network model to support wafer fab design*; February; 119

Huang, H-W. and S-H. Chung; *Cycle time estimation for wafer fab with engineering lots*; February; 105

Hung, Y-F. and G-J. Cheng; *Hybrid capacity modeling for alternative machine types in linear programming production planning*; February; 157

Iravani, S.M.R. and I. Duenyas; *Integrated maintenance and production control of a deteriorating production system*; May; 423

Jaffe, M., J. Bukchin and M. Tzur; *Lot splitting to minimize average flow-time in a two-machine flow-shop*; November; 953

Jewkes, E.M., Q-M. He and J. Buzacott; *The value of information used in inventory control of a make-to-order inventory-production system*; November; 999

Karaesmen, F., J.A. Buzacott and Y. Dallery; *Integrating advance order information in make-to-stock production systems*; August; 649

Kim, B., J.M.Y. Leung, K.T. Park, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663

Kim, B., S. Kim and S-H. Yea; *Shift scheduling for steppers in the semiconductor wafer fabrication process*; February; 167

Kim, S., S-H. Yea and B. Kim; *Shift scheduling for steppers in the semiconductor wafer fabrication process*; February; 167

Kim, S., Y.H. Lee and J. Park; *Experimental study on input and bottleneck scheduling for a semiconductor fabrication line*; February; 179

Klastorin, T.D., K. Moinzadeh and J. Son; *Coordinating orders in supply chains through price discounts*; August; 679

Kouvelis, P. and J.M. Milner; *Supply chain capacity and outsourcing decisions: the dynamic interplay of demand and supply uncertainty*; August; 717

Krass, D. and J.L. Beltrán; *Dynamic lot sizing with returning items and disposals*; May; 437

Lam, K. and W. Xing; *Capacitated single machine scheduling and its online heuristics*; November; 991

Lee, S., B. Kim, J.M.Y. Leung, K.T. Park and G. Zhang; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663

Lee, Y.H., J. Park and S. Kim; *Experimental study on input and bottleneck scheduling for a semiconductor fabrication line*; February; 179

Leung, J.M.Y., B. Kim, K.T. Park, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663

Li, C-L. and W-Q. Xiao; *Approximation algorithms for common due date assignment and job scheduling on parallel machines*; May; 467
Liman, S.D. and S.S. Panwalkar; *Single operation earliness–tardiness scheduling with machine activation costs*; May; 509
Lin, B.M.T. and T.C.E. Cheng; *Fabrication and assembly scheduling in a two-machine flowshop*; November; 1015

Milner, J.M. and P. Kouvelis; *Supply chain capacity and outsourcing decisions: the dynamic interplay of demand and supply uncertainty*; August; 717
Moinzadeh, K., T.D. Klastorin and J. Son; *Coordinating orders in supply chains through price discounts*; August; 679

Panwalkar, S.S. and S.D. Liman; *Single operation earliness–tardiness scheduling with machine activation costs*; May; 509
Park, J., Y.H. Lee and S. Kim; *Experimental study on input and bottleneck scheduling for a semiconductor fabrication line*; February; 179
Park, K.T., B. Kim, J.M.Y. Leung, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663
Pearn, W.L., S.H. Chung and M.H. Yang; *Minimizing the total machine workload for the wafer probing scheduling problem*; February; 211
Pfund, M., L. Yu, H.M. Shih, W.M. Carlyle and J.W. Fowler; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921
Prabhu, V. and S. Cho; *A vector space model for variance reduction in simple machine scheduling*; November; 933

Quintana, R.; *Recursive linear control of order release to manufacturing cells with random yield*; May; 489

Rohatgi, M., Y. Bassok and W. Hopp; *A simple linear heuristic for the service constrained random yield problem*; May; 479
Roundy, R.O. and M. Cakanyildirim; *SeDFAM: semiconductor demand forecast accuracy model*; May; 449

Shanthikumar, J.G. and T.W. Sloan; *Using in-line equipment condition and yield information for maintenance scheduling and dispatching in semiconductor wafer labs*; February; 191
Shih, H.M., L. Yu, M. Pfund, W.M. Carlyle and J.W. Fowler; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921
Sloan, T.W. and J.G. Shanthikumar; *Using in-line equipment condition and yield information for maintenance scheduling and dispatching in semiconductor wafer labs*; February; 191
Son, J., K. Moinzadeh and T.D. Klastorin; *Coordinating orders in supply chains through price discounts*; August; 679
Spearman, M.L., W.J. Hopp, S. Chayet, K.L. Donohue and E.S. Gel; *Using an optimized queueing network model to support wafer fab design*; February; 119
Swaminathan, J.M.; *Tool procurement planning for wafer fabrication facilities: a scenario-based approach*; February; 145

Tzur, M., B. Chen and R. Hassin; *Allocation of bandwidth and storage*; May; 501
Tzur, M., J. Bukchin and M. Jaffe; *Lot splitting to minimize average flow-time in a two-machine flow-shop*; November; 953

Wang, Y. and W. Zhao; *Coordination of joint pricing-production decisions in a supply chain*; August; 701
Wang, Y., M.A. Cohen and Y-S. Zheng; *Differentiating customer service on the basis of delivery lead-times*; November; 979
Wesolowsky, G.O., O. Berman and Z. Drezner; *Satisfying partial demand in facilities location*; November; 971
Wu, S.D. and R.M.E. Christie; *Semiconductor capacity planning: stochastic modeling and computational studies*; February; 131

Xiao, W-Q. and C-L. Li; *Approximation algorithms for common due date assignment and job scheduling on parallel machines*; May; 467
Xing, W. and K. Lam; *Capacitated single machine scheduling and its online heuristics*; November; 991

Yang, M.H., W.L. Pearn and S.H. Chung; *Minimizing the total machine workload for the wafer probing scheduling problem*; February; 211
Yea, S-H., S. Kim and B. Kim; *Shift scheduling for steppers in the semiconductor wafer fabrication process*; February; 167
Yu, L., H.M. Shih, M. Pfund, W.M. Carlyle and J.W. Fowler; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921

Zhang, G., B. Kim, J.M.Y. Leung, K.T. Park and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663
Zhao, W. and Y. Wang; *Coordination of joint pricing-production decisions in a supply chain*; August; 701
Zheng, Y-S., Y. Wang and M.A. Cohen; *Differentiating customer service on the basis of delivery lead-times*; November; 979

SUBJECT INDEX FOR 2002

1100 – Engineering design

Swaminathan, J.M.; *Tool procurement planning for wafer fabrication facilities: a scenario-based approach*; February; 145

2100 – Applied probability

Curry, G.L. and B.L. Deuermeyer; *Renewal approximations for the departure processes of batch systems*; February; 95
Hopp, W.J., M.L. Spearman, S. Chayet, K.L. Donohue and E.S. Gel; *Using an optimized queueing network model to support wafer fab design*; February; 119

2300 – Quality and reliability engineering

Bassok, Y., W. Hopp and M. Rohatgi; *A simple linear heuristic for the service constrained random yield problem*; May; 479

3000 – Inventory

Ertek, G. and P.M. Griffin; *Supplier- and buyer-driven channels in a two-stage supply chain*; August; 691
He, Q-M., E.M. Jewkes and J. Buzacott; *The value of information used in inventory control of a make-to-order inventory-production system*; November; 999
Karaesmen, F., J.A. Buzacott and Y. Dallery; *Integrating advance order information in make-to-stock production systems*; August; 649
Kim, B., J.M.Y. Leung, K.T. Park, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663
Klastorin, T.D., K. Moinzadeh and J. Son; *Coordinating orders in supply chains through price discounts*; August; 679
Zhao, W. and Y. Wang; *Coordination of joint pricing-production decisions in a supply chain*; August; 701

3100 – Inter-disciplinary and cross-functional studies

Ertek, G. and P.M. Griffin; *Supplier- and buyer-driven channels in a two-stage supply chain*; August; 691
Zhao, W. and Y. Wang; *Coordination of joint pricing-production decisions in a supply chain*; August; 701

3200 – Location, transportation and distribution

Berman, O., Z. Drezner and G.O. Wesolowsky; *Satisfying partial demand in facilities location*; November; 971
Chen, B., R. Hassin and M. Tzur; *Allocation of bandwidth and storage*; May; 501
Kim, B., J.M.Y. Leung, K.T. Park, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663

3300 – Production control

Iravani, S.M.R. and I. Duenyas; *Integrated maintenance and production control of a deteriorating production system*; May; 423
Karaesmen, F., J.A. Buzacott and Y. Dallery; *Integrating advance order information in make-to-stock production systems*; August; 649
Quintana, R.; *Recursive linear control of order release to manufacturing cells with random yield*; May; 489

3400 – Production planning

Beltrán, J.L. and D. Krass; *Dynamic lot sizing with returning items and disposals*; May; 437
Cakanyildirim, M. and R.O. Roundy; *SeDFAM: semiconductor demand forecast accuracy model*; May; 449
Christie, R.M.E. and S.D. Wu; *Semiconductor capacity planning: stochastic modeling and computational studies*; February; 131
Ertek, G. and P.M. Griffin; *Supplier- and buyer-driven channels in a two-stage supply chain*; August; 691
Kim, B., J.M.Y. Leung, K.T. Park, G. Zhang and S. Lee; *Configuring a manufacturing firm's supply network with multiple suppliers*; August; 663
Klastorin, T.D., K. Moinzadeh and J. Son; *Coordinating orders in supply chains through price discounts*; August; 679
Kouvelis, P. and J.M. Milner; *Supply chain capacity and outsourcing decisions: the dynamic interplay of demand and supply uncertainty*; August; 717
Wang, Y., M.A. Cohen and Y-S. Zheng; *Differentiating customer service on the basis of delivery lead-times*; November; ;979
Zhao, W. and Y. Wang; *Coordination of joint pricing-production decisions in a supply chain*; August; 701

3500 – Scheduling

Bukchin, J., M. Tzur and M. Jaffe; *Lot splitting to minimize average flow-time in a two-machine flow-shop*; November; 953
Cho, S. and V. Prabhu; *A vector space model for variance reduction in simple machine scheduling*; November; 933
Chung, S-H. and H-W. Huang; *Cycle time estimation for wafer fab with engineering lots*; February; 105
Hung, Y-F. and G-J. Cheng; *Hybrid capacity modeling for alternative machine types in linear programming production planning*; February; 157
Kim, S., S-H. Yea and B. Kim; *Shift scheduling for steppers in the semiconductor wafer fabrication process*; February; 167
Lee, Y.H., J. Park and S. Kim; *Experimental study on input and bottleneck scheduling for a semiconductor fabrication line*; February; 179
Lin, B.M.T. and T.C.E. Cheng; *Fabrication and assembly scheduling in a two-machine flowshop*; November; 1015
Panwalkar, S.S. and S.D. Liman; *Single operation earliness–tardiness scheduling with machine activation costs*; May; 509
Pearn, W.L., S.H. Chung and M.H. Yang; *Minimizing the total machine workload for the wafer probing scheduling problem*; February; 211
Sloan, T.W. and J.G. Shanthikumar; *Using in-line equipment condition and yield information for maintenance scheduling and dispatching in semiconductor wafer labs*; February; 191
Xiao, W-Q. and C-L. Li; *Approximation algorithms for common due date assignment and job scheduling on parallel machines*; May; 467
Xing, W. and K. Lam; *Capacitated single machine scheduling and its on-line heuristics*; November; 991
Yu, L., H.M. Shih, M. Pfund, W.M. Carlyle and J.W. Fowler; *Scheduling of unrelated parallel machines: an application to PWB manufacturing*; November; 921

GUEST REVIEWERS FOR 2002

Alessandro Agnetis, University di Siena, Italy
Bahram Alidaee, University of Mississippi
Ronald Armstrong, Rutgers University, Newark, New Jersey
Masao Asano, Osaka Prefecture University, Japan
Hayriye Ayhan, Georgia Institute of Technology
Yehuda Bassok, University of Southern California
Alok Baveja, Rutgers University, New Jersey
Omer Benli, California State University at Long Beach
W.C. Benton, Ohio State University
Mark Bergen, University of Minnesota
Joy Bhadury, California State University at Hayward
Ebru Bish, Virginia Polytechnic Institute and State University

OPERATIONS ENGINEERING

AUTHOR INDEX FOR 2002

Adickes, M.D., R.E. Billo, B.A. Norman, S. Banerjee, B.O. Nnaji and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823

Bandla, N., A. Gosavi and T.K. Das; *A reinforcement learning approach to a single leg airline revenue management problem with multiple fare classes and overbooking*; September; 729
Banerjee, S., M.D. Adickes, R.E. Billo, B.A. Norman, B.O. Nnaji and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823
Billo, R.E., M.D. Adickes, B.A. Norman, S. Banerjee, B.O. Nnaji and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823
Bukchin, J., R. Luquer and A. Shtub; *Learning in tele-operations*; March; 245
Burnetas, A.N., E.L. Örmeci and H. Emmons; *Dynamic policies of admission to a two-class system based on customer offers*; September; 813

Cario, M.C., J.J. Clifford, R.R. Hill, J. Yang, K. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297
Cheng, C.H., J. Miltenburg and H. Yan; *Analysis of wafer fabrication facilities using four variations of the open queueing network decomposition model*; March; 263
Clifford, J.J., M.C. Cario, R.R. Hill, J. Yang, K. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297

Das, T.K., A. Gosavi and N. Bandla; *A reinforcement learning approach to a single leg airline revenue management problem with multiple fare classes and overbooking*; September; 729
Diwekar, U.M. and K-J. Kim; *Hammersley stochastic annealing: efficiency improvement for combinatorial optimization under uncertainty*; September; 761

ElHafsi, M.; *Optimal leadtimes planning in serial production systems with earliness and tardiness costs*; March; 233
Emmons, H., E.L. Örmeci and A.N. Burnetas; *Dynamic policies of admission to a two-class system based on customer offers*; September; 813

Gosavi, A., N. Bandla and T.K. Das; *A reinforcement learning approach to a single leg airline revenue management problem with multiple fare classes and overbooking*; September; 729
Greenwood, A.G., L.P. Rees and F.C. Siochi; *A best-first search approach for determining starting regions in simulation optimization*; March; 283

Hill, R.R., M.C. Cario, J.J. Clifford, J. Yang, K. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297
Hodgson, T.J., K.A. Thoney, R.E. King, M.R. Taner and A.D. Wilson; *Satisfying due-dates in large multi-factory supply chains*; September; 803

Jeong, I-J. and V.J. Leon; *Decision-making and cooperative interaction via coupling agents in organizationally distributed systems*; September; 789

Karabuk, S. and S.D. Wu; *Decentralizing semiconductor capacity planning via internal market coordination*; September; 743
Khmelnitsky, E., K. Kogan and E. Levner; *A combinatorial approach to a class of parallel-machine, continuous-time scheduling problems*; March; 223
Kim, K-J. and U.M. Diwekar; *Hammersley stochastic annealing: efficiency improvement for combinatorial optimization under uncertainty*; September; 761
King, R.E., K.A. Thoney, T.J. Hodgson, M.R. Taner and A.D. Wilson; *Satisfying due-dates in large multi-factory supply chains*; September; 803
Kogan, K., E. Khmelnitsky and E. Levner; *A combinatorial approach to a class of parallel-machine, continuous-time scheduling problems*; March; 223

Laguna, M. and R. Martí; *Neural network prediction in a system for optimizing simulations*; March; 273
Leon, V.J. and I-J. Jeong; *Decision-making and cooperative interaction via coupling agents in organizationally distributed systems*; September; 789
Levner, E., K. Kogan and E. Khmelnitsky; *A combinatorial approach to a class of parallel-machine, continuous-time scheduling problems*; March; 223
Luquer, R., J. Bukchin and A. Shtub; *Learning in tele-operations*; March; 245

Malakooti, B. and Z. Yang; *Multiple criteria approach and generation of efficient alternatives for machine-part family formulation in group technology*; September; 837
Martí, R. and M. Laguna; *Neural network prediction in a system for optimizing simulations*; March; 273
Miltenburg, J., C.H. Cheng and H. Yan; *Analysis of wafer fabrication facilities using four variations of the open queueing network decomposition model*; March; 263
Montes, J.A. and N.D. Ramirez-Beltran; *Neural networks to model dynamic systems with time delays*; March; 313

Nnaji, B.O., M.D. Adickes, R.E. Billo, B.A. Norman, S. Banerjee and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823
Norman, B.A., M.D. Adickes, R.E. Billo, S. Banerjee, B.O. Nnaji and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823

Örmeci, E.L., A.N. Burnetas and H. Emmons; *Dynamic policies of admission to a two-class system based on customer offers*; September; 813

Rajgopal, J., M.D. Adickes, R.E. Billo, B.A. Norman, S. Banerjee and B.O. Nnaji; *Optimization of indoor wireless communication network layouts*; September; 823
Ramirez-Beltran, N.D. and J.A. Montes; *Neural networks to model dynamic systems with time delays*; March; 313
Rees, L.P., A.G. Greenwood and F.C. Siochi; *A best-first search approach for determining starting regions in simulation optimization*; March; 283

Reilly, C.H., M.C. Cario, J.J. Clifford, R.R. Hill, J. Yang and K. Yang; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297

Shtub, A., J. Bukchin and R. Luquer; *Learning in tele-operations*; March; 245

Siocho, F.C., L.P. Rees and A.G. Greenwood; *A best-first search approach for determining starting regions in simulation optimization*; March; 283

Taner, M.R., K.A. Thoney, T.J. Hodgson, R.E. King and A.D. Wilson; *Satisfying due-dates in large multi-factory supply chains*; September; 803

Thoney, K.A., T.J. Hodgson, R.E. King, M.R. Taner and A.D. Wilson; *Satisfying due-dates in large multi-factory supply chains*; September; 803

Ventura, J.A. and S-H. Yoon; *An application of genetic algorithms to lot-streaming flow shop scheduling*; September; 779

Wilson, A.D., K.A. Thoney, T.J. Hodgson, R.E. King and M.R. Taner; *Satisfying due-dates in large multi-factory supply chains*; September; 803

Wu, S.D. and S. Karabuk; *Decentralizing semiconductor capacity planning via internal market coordination*; September; 743

Yan, H., J. Miltenburg and C.H. Cheng; *Analysis of wafer fabrication facilities using four variations of the open queueing network decomposition model*; March; 263

Yang, J., M.C. Cario, J.J. Clifford, R.R. Hill, K. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297

Yang, Z. and B. Malakooti; *Multiple criteria approach and generation of efficient alternatives for machine-part family formulation in group technology*; September; 837

Yang. K., M.C. Cario, J.J. Clifford, R.R. Hill, J. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297

Yoon, S-H. and J.A. Ventura; *An application of genetic algorithms to lot-streaming flow shop scheduling*; September; 779

Zheng, S.; *Dynamic release policies for software systems with a reliability constraint*; March; 253

SUBJECT INDEX FOR 2002

400 – Industry

Cario, M.C., J.J. Clifford, R.R. Hill, J. Yang, K. Yang and C.H. Reilly; *An investigation of the relationship between problem characteristics and algorithm performance: a case study of the GAP*; March; 297

700 – Transportation, distribution

Gosavi, A., N. Bandla and T.K. Das; *A reinforcement learning approach to a single leg airline revenue management problem with multiple fare classes and overbooking*; September; 729

1000 – Engineering design

Malakooti, B. and Z. Yang; *Multiple criteria approach and generation of efficient alternatives for machine-part family formulation in group technology*; September; 837

1300 – Manufacturing systems

Miltenburg, J., C.H. Cheng and H. Yan; *Analysis of wafer fabrication facilities using four variations of the open queueing network decomposition model*; March; 263

2000 – Applied optimization

Adickes, M.D., R.E. Billo, B.A. Norman, S. Banerjee, B.O. Nnaji and J. Rajgopal; *Optimization of indoor wireless communication network layouts*; September; 823

2100 – Applied probability

Örmeci, E.L., A.N. Burnetas and H. Emmons; *Dynamic policies of admission to a two-class system based on customer offers*; September; 813

2200 – Computer and emerging methodologies

Bukchin, J., R. Luquer and A. Shtub; *Learning in tele-operations*; March; 245

Jeong, I-J. and V.J. Leon; *Decision-making and cooperative interaction via coupling agents in organizationally distributed systems*; September; 789

Kim, K-J. and U.M. Diwekar; *Hammersley stochastic annealing: efficiency improvement for combinatorial optimization under uncertainty*; September; 761

Ramirez-Beltran, N.D. and J.A. Montes; *Neural networks to model dynamic systems with time delays*; March; 313

2400 – Simulation

Laguna, M. and R. Martí; *Neural network prediction in a system for optimizing simulations*; March; 273

Rees, L.P., A.G. Greenwood and F.C. Siochi; *A best-first search approach for determining starting regions in simulation optimization*; March; 283

3400 – Production planning

ElHafsi, M.; *Optimal leadtimes planning in serial production systems with earliness and tardiness costs*; March; 233

Yoon, S-H. and J.A. Ventura; *An application of genetic algorithms to lot-streaming flow shop scheduling*; September; 779

3500 – Scheduling

Karabuk, S. and S.D. Wu; *Decentralizing semiconductor capacity planning via internal market coordination*; September; 743

Kogan, K., E. Khmelnitsky and E. Levner; *A combinatorial approach to a class of parallel-machine; continuous-time scheduling problems*; March; 223

Thoney, K.A., T.J. Hodgson, R.E. King, M.R. Taner and A.D. Wilson; *Satisfying due-dates in large multi-factory supply chains*; September; 803

Zheng, S.; *Dynamic release policies for software systems with a reliability constraint*; March; 253

GUEST REVIEWERS FOR 2002

Christos Alexopoulos, Georgia Institute of Technology
Yohanan Arzi, Ort Braude College, Israel
Adnan Aswad, University of Michigan-Dearborn
Enrique Benavent, Universty of Valencia, Spain
Saifallah Benfaafar, University of Minnesota
Gerard P. Cachon, University of Pennsylvania
Chester Chambers, Southern Methodist University
Yupo Chan, University of Arkansas at Little Rock
Frank Chen, Chinese University of Hong Kong
Zhi-Long Chen, University of Maryland
Raymond K. Cheung, Hong Kong University of Science and Technology, Hong Kong
Morris Cohen, University of Pennsylvania
William Cooper, University of Minnesota
Yue Dai, North Carolina State University
Mark S. Daskin, Northwestern University
Alon Efrat, University of Arizona
Mohsen ElHafsi, University of California at Riverside
Youyi Feng, Chinese University of Hong Kong
Gerd Finke, Leibniz-Imag, France

Liming Liu, Hong Kong University of Science and Technology
Jesus De Loera, University of California at Davis
William Marshall, Georgia Tech Research Institute
Shmuel S. Oren, University of California at Berkeley
Erol Pekoz, Boston University
Patrick Philipoom, University of South Carolina
Raymond Popovic, Georgia Institute of Technology
Lawrence W. Robinson, Cornell University
Donald B. Rosenfield, MIT
Avrhham Shtub, The Technion, Israel
Lawrence M. Seiford, University of Michigan
James Swain, University of Alabama at Huntsville
Michael Taaffe, University of Minnesota
Gamze Tokol, Earley Corporation
Kwok-Leung Tsui, Georgia Institute of Technology
Vedat Verter, University of Toronto, Canada
Bravi Vidakovic, Georgia Institute of Technology
Yunzeng Wang, Case Western Reserve University
James R. Wilson, North Carolina State University
S. David Wu, Lehigh University
Daniel Dajun Zeng, University of Arizona
Hanqin Zhang, Chinese Academy of Sciences
Wen Zhao, University of Illinois at Urbana-Champaign

QUALITY AND RELIABILITY ENGINEERING

AUTHOR INDEX FOR 2002

Apley, D.W. and F. Tsung; *The dynamic T^2 chart for monitoring feedback-controlled processes*; December; 1043

Ben-Gal, I. and M. Caramanis; *Sequential DOE via dynamic programming*; December; 1087
Ben-Gal, I., Y.T. Herer and T. Raz; *Self-correcting inspection procedure under inspection errors*; June; 529

Caramanis, M. and I. Ben-Gal; *Sequential DOE via dynamic programming*; December; 1087
Chen, J-J. and R-S. Guo; *An EWMA-based process mean estimator with dynamic tuning capability*; June; 573
Choo, A.S. and K. Linderman; *Robust economic control chart design*; December; 1069
Chou, R-J., S.T. Tseng and S-P. Lee; *A study on a multivariate EWMA controller*; June; 541

Del Castillo, E. and R. Rajagopal; *A multivariate solvable EWMA process adjustment scheme for drifting processes*; December; 1055

Emmons, H. and G. Rabinowitz; *Inspection allocation for multistage deteriorating production systems*; December; 1031

Gan, F.F., V. Kuralmani, M. Xie and T.N. Goh; *A conditional decision procedure for high yield processes*; December; 1021
Gerchak, Y. and Q-M. He; *On the identity of the smallest random variable*; June; *;559*
Goh, T.N., V. Kuralmani, M. Xie and F.F. Gan; *A conditional decision procedure for high yield processes*; December; 1021
Guo, R-S. and J-J. Chen; *An EWMA-based process mean estimator with dynamic tuning capability*; June; 573

He, Q-M. and Y. Gerchak; *On the identity of the smallest random variable*; June; *;559*
Herer, Y.T., I. Ben-Gal and T. Raz; *Self-correcting inspection procedure under inspection errors*; June; 529

Kogan, K. and T. Raz; *Optimal allocation of inspection effort over a finite planning horizon*; June; 515
Kuralmani, V., M. Xie, T.N. Goh and F.F. Gan; *A conditional decision procedure for high yield processes*; December; 1021

Lee, S-P., S.T. Tseng and R-J. Chou; *A study on a multivariate EWMA controller*; June; 541
Leung, P.B.K. and F.A. Spiring; *The inverted beta loss function: properties and applications*; December; 1101
Levitin, G.; *Allocation of test times in multi-state systems for reliability growth testing*; June; 551
Linderman, K. and A.S. Choo; *Robust economic control chart design*; December; 1069

Plante, R.; *Multivariate tolerance design for a quadratic design parameter model*; June; 565

Rabinowitz, G. and H. Emmons; *Inspection allocation for multistage deteriorating production systems*; December; 1031
Rajagopal, R. and E. del Castillo; *A multivariate solvable EWMA process adjustment scheme for drifting processes*; December; 1055
Raz, T. and K. Kogan; *Optimal allocation of inspection effort over a finite planning horizon*; June; 515
Raz, T., Y.T. Herer and I. Ben-Gal; *Self-correcting inspection procedure under inspection errors*; June; 529

Spiring, F.A. and B.P.K. Leung; *The inverted beta loss function: properties and applications*; December; 1101

Tsai, H-T. and S-F. Wu; *Sequential screening procedure based on individual misclassification error*; December; 1079
Tseng, S.T., R-J. Chou and S-P. Lee; *A study on a multivariate EWMA controller*; June; 541
Tsung, F. and D.W. Apley; *The dynamic T^2 chart for monitoring feedback-controlled processes*; December; 1043

Wu, S-F. and H-T. Tsai; *Sequential screening procedure based on individual misclassification error*; December; 1079

Xie, M., V. Kuralmani, T.N. Goh and F.F. Gan; *A conditional decision procedure for high yield processes*; December; 1021

Ben-Gal, I. and M. Caramanis; *Sequential DOE via dynamic programming*; December; 1087
Ben-Gal, I., Y.T. Herer and T. Raz; *Self-correcting inspection procedure under inspection errors*; June; 529
Del Castillo, E. and R. Rajagopal; *A multivariate solvable EWMA process adjustment scheme for drifting processes*; December; 1055
Emmons, H. and G. Rabinowitz; *Inspection allocation for multistage deteriorating production systems*; December; 1031
Guo, R-S. and J-J. Chen; *An EWMA-based process mean estimator with dynamic tuning capability*; June; 573
Kogan, K. and T. Raz; *Optimal allocation of inspection effort over a finite planning horizon*; June; 515
Kuralmani, V., M. Xie, T.N. Goh and F.F. Gan; *A conditional decision procedure for high yield processes*; December; 1021
Levitin, G.; *Allocation of test times in multi-state systems for reliability growth testing*; June; 551
Linderman, K. and A.S. Choo; *Robust economic control chart design*; December; 1069
Plante, R.; *Multivariate tolerance design for a quadratic design parameter model*; June; 565
Tsai, H-T. and S-F. Wu; *Sequential screening procedure based on individual misclassification error*; December; 1079
Tseng, S.T., R-J. Chou and S-P. Lee; *A study on a multivariate EWMA controller*; June; 541
Tsung, F. and D.W. Apley; *The dynamic T^2 chart for monitoring feedback-controlled processes*; December; 1043

GUEST REVIEWERS FOR 2002

Cesar Acosta-Mejia, Instituto Tecnologico Autonomo De Mexico
B. Mike Adams, University of Alabama
James H. Albert, Bowling Green State University
Susan L. Albin, Rutgers University
G. Allen, Purdue University
Raid Amin, University of West Florida
Christine Anderson-Cook, Virginia Polytechnic Institute and State University
M. Appa Anjanappa, University of Maryland
Daniel W. Apley, Texas A&M University
Alper Atamturk, University of California
Bilal M. Ayyub, University of Maryland
Charles D. Bailey, University of Central Florida
Irad Ben-Gal, Tel-Aviv University
Roy Billinton, University of Saskatchewan
M.C. Bonney, University of Nottingham
Connie Borror, Arizona State University
Kimball E. Bullington, Middle Tennessee State University
Jai Hyun Byun, Gyeongsang National University
Philippe Castagliola, Ecole Des Mines De Nantes
Darek Ceglarek, University of Wisconsin
Chun Chan, Lucent Technologies
Yupo Chan, University of Arkansas, Little Rock
Argon Chen, National Taiwan University
Hanfeng Chen, Bowling Green State University
Victoria C.P. Chen, University of Texas, Arlington
Youn-Min Chou, The University of Texas at San Antionio
David W. Coit, Rutgers University
Terry R. Collins, University of Arkansas
Antonio F. B. Costa, UNESP-Sao Paulo State
Lawrence H. Crow, General Dynamics
Tapas K. Das, University of South Florida
J.J. Daudin, Institute National Agronomique
Darwin J. Davis, University of Delaware
Enrique Del Castillo, Pennsylvania State University
Scott Dick, University of South Florida
Yu Ding, Texas A&M University
Althea D'Souza, Luftig & Warren International
John English, University of Arkansas
B.A. Ergashev, Washington University in St. Louis
Shu-Kai Fan, Yuan Ze University
Flavio Fogliatto, UFRGS/PPGEP, Brazil
John Fowler, Arizona State University
Fiorenzo Franceschini, Politicnico di Torino
S.G. Frickenstein, US Air Force Academy
Ricardo Fricks, Motorola, Inc.
A.J. Gammerman, University of London
Ilya Gertsbakh, Ben-Gurion University
Shlomo Globerson, Tel Aviv University
Fred W. Glover, University of Colorado
David M. Goldsman, Georgia Inst. of Technology
William A. Golomski, W.A. Golomski & Associates
Kemal Gursoy, Long Island University
John M. Harris, Southern Company Services
Rick Hathaway, Georgia Southern University
Douglas M. Hawkins, University of Minnesota
David He, The University of Illinois
Gary Herrin, University of Michigan
Frank Kwang-Ming Hwang, National Chiao Tung University
H. Brian Hwarng, National University of Singapore
Daniel Jeske, Bell Laboratories
Judy Jin, University of Arizona
Paul B. Kantor, Rutgers University
Alan F. Karr, National Institute of Statistical Sciences
Brian M. Kleiner, Virginia Polytechnic Institute and State University
Alex J. Koning, Erasmus University Rotterdam, Netherlands
Yeh Lam, Zhongshan University
Tian-Shyung Lee, Fu-Jen Catholic University
Larry Leemis, College of William and Mary
Gregory Levitin, Israel Electric Corporation
Linxiong Li, University of New Orleans
Kevin W. Linderman, Carlson School of Management
Chin-Chia Jane Ling, Tung College
J.C. Lu, Georgia Institute of Technology
Saeed Maghsoodloo, Auburn University
Yashwant K. Malaiya, Colorado State University
Christina Mastrangelo, University of Virginia
Aladjem Mayer, Ben-Gurion University of the Negev, Israel
D'Arcy P. Mays, Virginia Commonwealth University
E.V. McIntyre, Florida State University
William Q. Meeker, Iowa State University
Douglas C. Montgomery, Arizona State University
Joel A. Nachlas, Virginia Polytechnic Institute and State University
Peter R. Nelson, Clemson University
Harriet Nembhard, University of Wisconsin, Madison
Celestine Ntuen, North Carolina A&T State University
Geoffrey Okogbaa, University of South Florida
Geoffrey T. Parks, The University of Cambridge
John J. Peterson, GlaxoSmithKline Pharmaceuticals
Robert D. Plante, Purdue University
Alan Polansky, Northern Illinois University
Stephen Pollock, University of Michigan
M.A. Rahim, University of New Brunswick
S. Rajagopalan, University of Southern California
John Ramberg, University of Arizona
A. Favi Ravindran, Pennsylvania State University
Tzvi Raz, Tel Aviv University
David M. Reineke, University of Wisconsin
Marion R. Reynolds, Jr., Virginia Polytechnic Institute and State University
J.W. Rupe, Qwest Commercial International, Inc.
Chen Shaw, University of Rhode Island
Haim Shore, Ben-Gurion University
James R. Simpson, Florida State University
Nozer D. Singpurwalla, George Washington University
Alice Smith, Auburn University
Ross Sparks, Macquarie University
Stefan Steiner, University of Waterloo
Joe H. Sullivan, Mississippi State University
George Tagaras, Aristotle University of Thessaloniki
Jen Tang, Purdue University
Kwei Tang, Purdue University
Loon Ching Tang, The National University of Singapore
James Tannock, University of Nottingham
Cecilia Temponi, Southwest Texas State University
E.V. Thomas, Sandia National Labs
Neil H. Timm, University of Pittsburgh
Kishor Trivedi, Duke University
Sheng-Tsaing Tseng, National Tsing Hua University
Fugee Tsung, Hong Kong University of Sci. & Tech.
Stephen Vardeman, Iowa State University
Timothy S. Vaughan, University of Wisconsin, Equ Claire
G. Geoffrey Vining, Virginia Polytechnic Institute and State University
Mark R. Wade, LSU Medical Center
James E. Ward, Purdue University
Don G. Wardell, The University of Utah
K. Preston White Jr., University of Virginia
Ward Whitt, AT&T

James R. Wilson, North Carolina State University
Kai Xu, National University of Singapore
Shigeru Yamada, Tottori University
Arthur Yeh, Bowling Green State University
Wei-Chang Yeh, Feng Chia University
Willard I. Zangwill, The University of Chicago
Panlop Zeephongsekul, RMIT University
Wu Zhang, Nanyang Technological University
Shiyu Zhou, University of Michigan
Christopher Zobel, Virginia Polytechnic Institute and State University
Ming J. Zuo, University of Alberta
